| • REST API | • Flutter |
| • C# | • Git |
| • SQL | • GraphQL |
| • HTML | • CSS |

MORE SKILLS

- Scrum
- Problem solving
- Team working
- Leadership
- Math

WORKING EXPERIENCE

FREELANCE SOFTWARE DEVELOPER - 2020

I decided to spend my free time in a different way. I got clients on my own and made useful mobile apps for them.

- https://play.google.com/store/apps/details?id=com.mutual_acmo&hl=es&gl=US
 - Mobile app built with FLUTTER / DART that reduces the wait time and contact of people in quarantine. It takes advantage of Firebase REST API.

FULLSTACK DEVELOPER - 2019, BI-SPORTS

<https://www.bi-sports.com/>

Two professors I had at University were the owners of the company. I created on demand web apps using:

- HTML5
- CSS3
- VanillaJS
- PHP
- MySQL
- GIT
- BITBUCKET
- SCRUM

EDUCATION

UNIVERSIDAD ABIERTA INTERMARICANA - SYSTEMS ENGINEERING

2018 - PRESENT

In 2020 I got the Systems Analyst degree with a grade point average of 9.60

PERSONAL PROJECTS

Check out my web portfolio for more details. (IN PROGRESS)

<https://gianelli99.github.io/>

BINANCE TRADING BOT (IN PROGRESS)

- MERN Trading bot connected with Binance API.
- It can be controlled via HTTP requests or Telegram Messages.

<https://github.com/GianElli99/binance-trading-bot>
